

THE LAST TOAST

A Cooperative Murder Mystery for 5 Detectives

DISTRIBUTE TO: ALL PLAYERS

Give this document to all 5 detectives at the start of the game (Phase 0). This is their introduction to the case.

CASE FILE: MH/ALB/2024/1847

Field	Detail
Victim	Arjun Malhotra, Industrialist
Location	Malhotra Estate, Alibaug, Maharashtra
Date of Death	December 14, 2024
Classification	CLASSIFIED BRIEFING

HOW TO PLAY

Overview

You are a team of five detectives investigating the death of billionaire Arjun Malhotra. You will receive evidence in phases and must work together to solve the case.

Game Structure

Phase	Duration	Activity
Phase 1	20 min	Read initial evidence, share findings, establish timeline
Phase 2	30 min	Receive additional evidence, identify inconsistencies
Phase 3	15 min	Major new information revealed
Phase 4	15 min	Final deliberation, submit answers

Rules

- Each detective receives different evidence — you must share to solve the case
- No single detective has enough information alone
- Discuss openly; this is cooperative, not competitive
- At the end, you must unanimously agree on answers

Victory Condition

Answer all five final questions correctly.

THE FIVE FINAL QUESTIONS

At the end of the investigation, your team must correctly answer:

#	Question
1	Who strangled the victim?
2	Who drugged the whiskey bottle?
3	Why couldn't the victim fight back?
4	When was the bottle tampered with?
5	What single piece of evidence proves the killer's identity beyond reasonable doubt?

VICTIM PROFILE

Arjun Malhotra

ABOUT DIAZEPAM

Maharashtra State Forensic Laboratory — Reference Note

Diazepam is a benzodiazepine sedative commonly used for anxiety, muscle spasms, and seizures. At high doses, it causes severe sedation and muscle weakness.

Property	Detail
Common Names	Valium
Therapeutic Range	100-250 ng/mL
Toxic Range	>500 ng/mL
Effects at Toxic Levels	Severe drowsiness, muscle weakness, impaired coordination, confusion, respiratory depression
Onset	15-45 minutes after ingestion
Availability	Prescription medication; also available through pharmaceutical channels

Victim's Blood Level: 850 ng/mL (well above toxic threshold)

ABOUT THE CAUSE OF DEATH

Ligature Strangulation

Ligature strangulation involves compression of the neck using a flexible object (cord, rope, belt, etc.) applied with sufficient force to occlude blood vessels and/or airway.

Finding	Significance
Ligature marks	Indicates external force applied to neck
Petechial hemorrhaging	Small red dots in eyes/face from blood pressure
Hyoid bone	May be fractured in violent strangulation
Defensive wounds	Typically present when victim can resist

Critical Observation: The victim showed **NO DEFENSIVE WOUNDS** despite violent death. This suggests he was unable to resist the attack.

DETECTIVE ASSIGNMENTS

Cut along dotted lines and distribute:

DETECTIVE 1: TIMELINE ANALYST

Focus: Security footage, timestamps, movement patterns, alibis

DETECTIVE 2: FORENSICS LEAD

Focus: Autopsy, toxicology, physical evidence, crime scene analysis

DETECTIVE 3: SOCIAL OBSERVER

Focus: Witness statements, relationships, behavioral observations

DETECTIVE 4: OBJECTS & SPACE

Focus: Physical layout, objects, positions, spatial analysis

DETECTIVE 5: MOTIVE & MONEY

Focus: Financial records, wills, business dealings, motives

PROCEED TO PHASE 1

Once all detectives have read this brief, the host will distribute Phase 1 evidence packets.

Each detective will receive different documents relevant to their specialty.

Remember: No single detective has enough information to solve the case. You must share your evidence and work together.
